

# BIA HR - Successful solutions

## Data security and professionalism for Printec Group Romania

- Payroll is a complex process and requires a professional, flexible and integrated approach to each situation in the sphere of salaries and labor relations. Until now, BIA HR has proven the knowledge of the various types of labor relations and we want this collaboration to continue as harmonious as it is.
- Printec exists to provide innovative services and solutions that generate efficiency and comfort. We want to be the natural choice when it comes to easy and secure interactions, anytime and anywhere. For more than 20 years, we have ensured a unique distribution and system integration for world-leading products and technologies in the field of bank automation, POS terminals, communications encryption / decryption and Smart Card technologies.

*" We chose BIA HR due to its professionalism of personal data protection and the recommendations we received about the consultants team. The need for data security and the daily necessities regarding the payroll area are thus covered.*

*The proactive approach, the trust and the security we needed in the change process are notable aspects that have persuaded us to opt for a partnership with BIA. "*

# From challenge to solutions

---

**Printec Group Romania** is one of the largest providers of payment solutions for the banking industry on the local market. Pioneer in the field of automation of transactions, Printec Group Romania managed, as a subsidiary of the Greek group, to contribute much of the innovation and know-how necessary for the progressive expansion of the bank card acceptance network at national level. The solutions offered by the company range from cash or card transactions to self-service and data monitoring and analysis.

**The challenge:** Printec Romania is a company that relies on technology and data security. Therefore, information security issues in the electronic environment are a responsibility in the solutions offered to their clients and, at the same time, an implicit request for the payroll service provider. Over 200 Printec employees require a fair salary and zero security breach in the application that processes the payroll data. Moreover, professional support in the process of change is useful for a smooth and error-free transition.

**The solution:** Over 25 years of experience in HR services and permanent investment in the security of payroll and personal administration applications determine BIA HR to assume and fulfill its commitment to error-free payroll processing and the security of all data. The BIA HR approach in the field of human resources implies efficiency and continuous support offered to clients-partners. Thus, the process of taking over and the transition of information has been accomplished quickly and easily due to the trust and security offered by the BIA consultants involved in the implementation of the application. They assured the compliance of data flows, processes and legal results and proactively responded to expectations.
